

EDUCATE AND STIMULATE
YOUR CHILD THROUGH PLAY

www.hg-education.com

01707 248 607

Children love playing games, whether they be computer games, console games or electronic games. Would you like your child to learn about how these games operate through a LEGO Robotics after school club program?

Designed for children in years 3 and above, our club will teach them how to build various robots and explain how we use robots in the real world. There will also be an element of basic programming. The last week of term will result in the children taking part in an exciting game of Robot Wars.....May the best builder win!!!!

Using LEGO® Mindstorms® children can build simple robots and then each week they can build more and more powerful robots. Newly designed course so that all models can be built within 30 – 45 minutes and then 15 minutes to learn and play with their working models.

If you would like your child to attend our club please complete this form and return to the school office along with your payment
